

# The BEYOND® Whitening Accelerator

## Advanced Technology Ensures Safety, Comfort, and Results

- > Most advanced light filtration system of any power whitening system ensures patient safety and comfort
- > Harmful ultraviolet light and heat are filtered out through a coated optical lens and over 12,000 optical fibers
- > Powerful 150 watt halogen bulb emits a high-intensity blue light (480-520 nanometers wavelength) for faster whitening results
- > Operates at a lower temperature than similar products, increasing patient comfort levels and decreasing the risk of developing tooth sensitivity

## Expect a Superior Product

- > Chair-side, cold-light, power whitening accelerator lamp
- > Whitens teeth between five to 14 shades, with an average improvement of eight shades, in three consecutive 10 minute sessions
- > Very effective for teeth that have been stained by smoking or by consuming staining substances such as coffee, tea, or red wine
- > Also whitens teeth discolored by certain medicines, such as tetracycline, or speckled by fluoride
